Member to Member Code Creation

By creating and providing a M2M Code to another UICCU member, you are allowing that individual to make transfer deposits or loan payments to your UICCU business account via Digital Banking. You may assign multiple M2M Codes for your UICCU account or one M2M code given to multiple UICCU members. You may revoke an individual's ability to transfer to your account at any time by clicking the Create Code tab under Member2Member Accounts and click Delete next to the corresponding M2M code.
